"I don't go to school, but I would like to" (Samira, 10)

Yes, this is us: street kids. If we had the choice, we would pick something better for ourselves.

At this moment, street kids are the most vulnerable group in Serbia. Without a safe place to visit they will continue to live out scarred destinies preoccupied with problems children should not suffer, making "adults out of children".

The initiative of both public and private donors, domestic and foreign, wanting to help the children is something on which **The Drop-In for Street Kids** depends. Travel agency "**Hola Tours**" has generously offered humanitarian aid to **The Drop-In** under the project name "**In Spain with a smile**".

It is only through action and a true sense of community that the future of vulnerable children will be positively affected. With the objective to help keep **The Drop-In** sustainable to help these children, "**Hola Tours**" is giving **The Drop-In for Street Kids 1%** of its sales.
